

2" - 8" ROLLER CRADLE SLING

Design Features

- Cradle assembly for pipe sizes 2" (51MM) through 8" (204 MM).
- The cradle design provides quick disassembly for transit and storage.
- Designed load capacity insures safe handling of heavy wall pipe.
- Multiple urethane rollers spaced to support the pipe evenly and prevent an "egging" problem.
- The cradle design eliminates welded seam hang-up.
- The wire rope assembly will meet ANSI B-30-9 sling requirements, OSHA 1910.184 sling requirements and OSHA 1926.251 material handling requiremntns. To insure greater personnel safety.
